EXPERIENCE

Full Stack Developer Trainee

March 2025 – November 2025

Gradiious

- Engaged in intensive Full Stack Development training, mastering frontend and backend web application development methodologies.
- Developed and deployed 2 full-stack web applications (one MERN, one HTML/CSS/JS/Node/Express/MySQL), covering complete CRUD operations and API integration.
- Implemented RESTful APIs, user authentication, and responsive UI design, ensuring seamless client-server communication.

EDUCATION

Shri Vishnu Engineering College for Women, Bhimavaram

2022 - 2026

B.Tech in Artificial Intelligence and Data Science; CGPA: 8.85/10

SKILLS

Programming Languages: Java, Python, JavaScript

Web Technologies: HTML, CSS, React.js, Node.js, Express.js, RESTful APIs, CRUD Operations

Databases: MySQL, MongoDB(basics)

Tools & Platforms: VS Code, Google Colab, Thunder Client, GitHub, MongoDB Compass, MySQL Workbench, Vercel, Render

Data Science ML: Data Science Fundamentals, Machine Learning, NLP, Data Structures Algorithms

PROJECTS

Find Helpers – Full-Stack Service Booking App

- Engineered a role-based web app connecting users with nearby professionals, featuring dynamic request tracking, secure authentication, and personalized dashboards.
- Implemented real-time status updates and user-professional interaction flows using HTML, CSS, JavaScript, Node.js, Express.js, and MySQL.

Scribbly – Real-time Collaborative Drawing Game

- Architected a two-player Pictionary-style web application using MERN stack and Socket.io, enabling synchronized drawing and real-time guessing on a shared canvas.
- Utilized Socket.io for robust real-time communication protocols, facilitating dynamic interactive multiplayer experiences.

Restaurant Review Analysis – NLP-driven GUI Application

- Developed a GUI application to analyze restaurant reviews, generating informative WordClouds and predicting customer sentiment using NLP models.
- **Tech Stack:** Python, NLP, Machine Learning, Tkinter.

Heart Failure Prediction – Machine Learning Model

- Developed and evaluated Machine Learning models to predict heart failure risk from clinical data using Scikit-learn, achieving improved accuracy through preprocessing and feature selection.
- **Tech Stack:** Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn.

CERTIFICATIONS

- Smart Coder from Smart Interviews
- Practical Machine Learning (3 Phases)
- Introduction to Data Science with Python from edX
- Data Structures with C from Great Learning Academy

EXTRA-CURRICULAR & ACHIEVEMENTS

- Student Coordinator, SDG Club, SVECW: Organized awareness drives on sustainable goals.
- Won 1st Place in Community Service Project Expo, Department of AI, SVECW.
